

The Dreadful DUO: Cold and Dark Winter Hazards

Burlington Aviation is offering a rare opportunity to witness how in-flight icing effects aircraft systems and flight characteristic through a RED Bird Simulator. While a volunteer "flies" the simulator, all attendees will see what he/she sees in the simulator projected on a large screen. This will include scenarios such as in-flight icing, tail plane icing, pitot-static icing, vacuum failures, and more. Simulated conditions of marginal night VFR over snow, water, sparsely populated areas, in-flight snow, and more will be demonstrated. Seating is limited. Click the link below and Register TODAY.

Directions: The classroom facility is across the street from the airport. Look for seminar signs.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
